1) a) 72 – 45 = 27

b) 81 – 32 = 49

c) Car: 103 + 87 = 190

Bike: 25 + 32 = 57

190 – 57 = 133

133 more children travelled by car compared to bike in December and April.

d) Accept any of the following calculations: 72 + 25 + 103 = 200; 81 + 32 + 87 = 200; 109 + 46 + 45 = 200. 200 children were surveyed.

e) More children travelled by car in December. Accept any logical explanation about why this could be the case. For example, in December, the weather is typically colder so fewer children chose to walk or cycle compared to the other months.
